

The Village of North Freedom currently has a Storm Sewer located on Willow St. North Freedom, WI that is in need of repair. The riverbank has washed away after many high waters and floods exposing the existing pipe that has now broken off. The Board is seeking quotes for contractor services to cut out the existing storm sewer pipe and create a natural spillway to the river using fabric and riprap. This project needs to be accessed and completed during the same time as when 2 homes in the Village are to be demolished to provide as little damage as possible to the property owner's land. The storm sewer is accessible through an easement and through the 2 homes that the Village just acquired. The Board would like quotes of services to be received on September 13, 2021 at 3:45 P.M. to be reviewed that night at 7:00 P.M. at the Regular Board Meeting.

Please see the below specifications:

*Original engineering plan from MSA

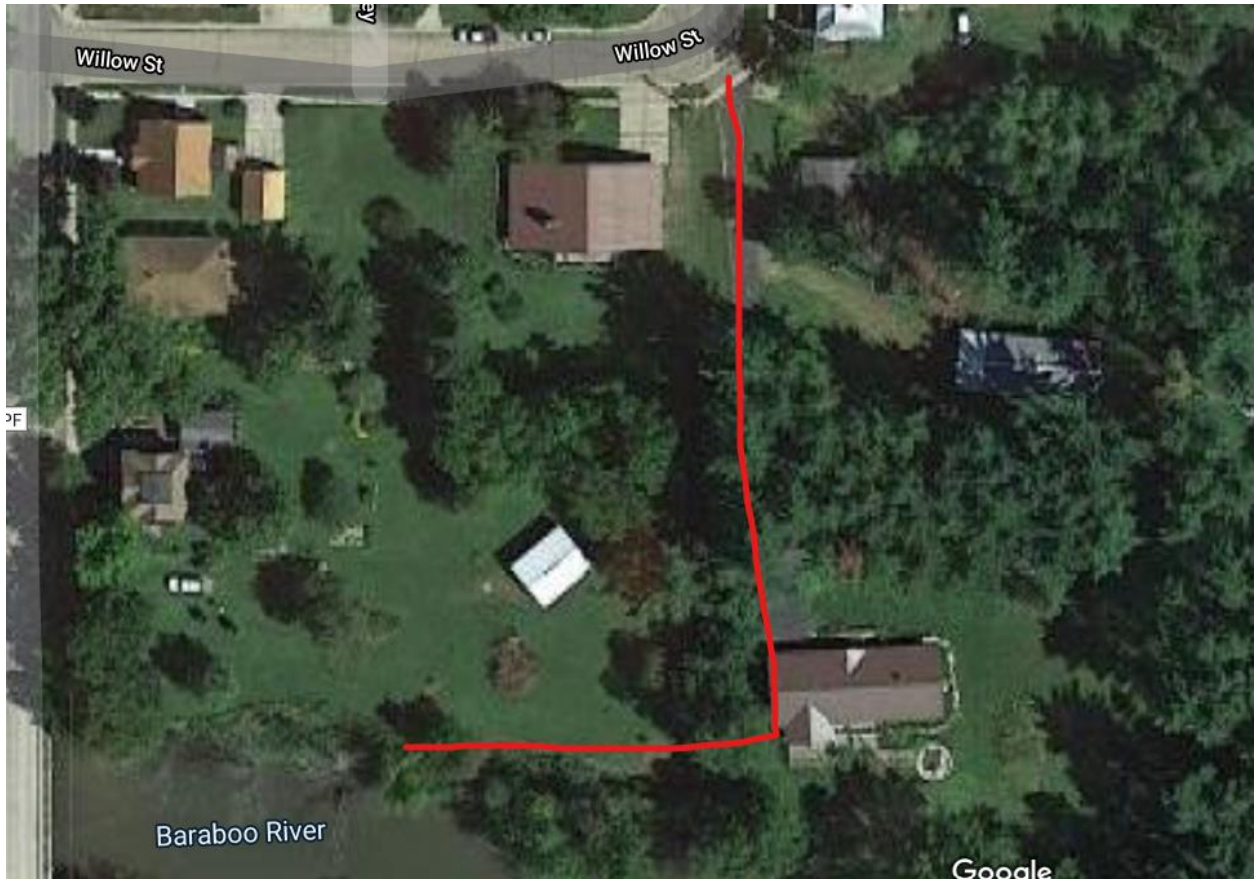

*Where the pipe is broke. The pipe would need to be cut out and then slope down towards the river where fabric and riprap could be laid down to create a natural spillway to the river for the storm sewer. Just the approximate section in red

*This “culvert” would be removed as well. Again creating a natural spillway to the river.

Approximate location - Access from 120 S Oak St...Any damage to the turf/grass should be fixed/filled in...
